

# Advanced Higher Graphic Communication Homework

## Built Environment Drawings 2

A housing development is being planned for ground on the edge of West Kilbride. The developer has produced a range of drawings that will be used by industry professionals as well as possible purchasers of the houses.

1. The floor plan of the house is shown. Describe two ways that it could be used by an interior designer and one way a possible buyer of the house would use the graphic. You should give a different answer for each response.
